What are the races which have dominated England since the invasion of the Romans?  
The Derby and the Grand National, miss."

## Artificial Ice Plant to be Discussed

Committee Appointed to Organize Plan to Raise Funds as Early as Possible

Following the annual meeting of the hockey club on Friday evening, the following committee was appointed, entirely independent of the hockey club, to draw up a plan to raise funds for the installation of an artificial ice plant at the rink.

It was stated that with artificial ice, skating would be provided throughout the season and there would be no interruption of hockey schedules. The plan suggested is to secure funds by monthly contributions over a certain period.

The committee is as follows: H. T. Halliwell, president; W. L. Rippon, secretary; H. C. McBurney, Bert Garrett, H. Chamberlain, Mayor Pattinson, R. F. Barnes, J. A. McDonald, W. White, J. J. McIntyre, R. Spillers. This is representative of the council, school board, the miners' association and the Board of Trade. A meeting of the committee will be called as soon as a tentative plan has been arranged.

## Local News

Word has been received by Miss Balbina Pietraszko that her brother John, who left here three years ago to take advanced studies on the violin in Warsaw, was recently in London. He is teaching in Warsaw, and is likely to remain there for some time.

Mrs. Cornett will leave on Friday to spend six months in Vancouver. During the past season she has taken an active part in the Rebekah Lodge and also as president of the Ladies' Guild of St. Alban's church. She hopes to resume her duties on her return late in the year.

Wes. Vincent returned to Coleman last week and with Mrs. Vincent will live in the house formerly occupied by Fraser McLeod on Seventh Street. He has been appointed to an official position in the International Coal Co. machine shop.

Radio news stated last night that Harry King of Bruce-Robinson Electric Co. had sustained a fractured skull in an automobile accident near Calgary. He was formerly salesman here for General Electric agency, at Pattinson's Hardware.

Work started this morning by the town to place another coat of hard surface on the badly broken up corner at Sam's Service Station. The town's annual program of hard surfacing has already started, numerous piles of gravel being seen at various points throughout town.

## Going On "Circle Tour"

Mr. and Mrs. Roach Cousins left this afternoon by Greyhound bus on one of the company's popular "circle tours." The tour will take them to both world's fairs at San Francisco and New York as well as all the important cities in the southern States.

## FIND NEGLIGENCE IN SOUTH HIGHWAY DEATH

PINCHER CREEK.—An open verdict was returned by the jury in an inquest here Friday evening into the death of Frederick G. Morris, who was killed April 29 when his motorcycle collided head-on with a car driven by Harry Galt of Coleman. The case is now in the hands of the attorney-general, acting with the police. The jury decided after two hours' deliberation that there was negligence on both sides.

## Holidays Next Week, Wednesday and Friday, May 24-26

Mayor Pattinson on Tuesday telephoned all important stores in the Pass towns, and it was agreed that next week the holiday would be observed as follows:

Wednesday, May 24.—Closed all day, in observance of Victoria Day.

Friday, May 26.—Closed all day, in honor of the visit of the King and Queen to Calgary.

The public are asked to remember these holidays and arrange their shopping accordingly.

There will be NO HOLIDAY OBSERVANCE this coming Saturday, May 20.

## News From Edmonton

Social Credit Secretariat in London Slides Into Liquidation—Exit Major Douglas

EDMONTON, Alta.—Social Credit as an economic possibility and a political platform is to be a thing of the past, even in Alberta. In London the word came during the week that the "Social Credit Secretariat" had folded its wings and slid into liquidation; and that spells the end of the famed Douglas system, if indications mean anything.

But the interesting feature to Albertans is that the Social Credit of William Aberhart—that is Major C. H. Douglas' description of it is to be believed—is also slipping fast and of the things of common sense and political expediency into the limbo of the market has been faded.

In a recent address to 500 supporters in the Strand Theatre, Edmonton, Aberhart solemnly warned them to be on the watch "for our new democracy movement." To be prepared to support it when it is announced.

During the same week, significantly, the Hon. W. D. Herridge, accompanied by that advocate of any old freak economic or political theory, C. A. Bowman, editor-in-chief of the Ottawa Citizen, made a call in Edmonton on Premier Aberhart. Two days were spent in the Alberta capital by these two knights-errant of the new day, most of the time in conference and consultations with Aberhart and members of the cabinet. At least several hours were actually spent with the cabinet at the parliament buildings.

Mr. Aberhart had a long talk with Mr. Herridge and Mr. Bowman at the Macdonald Hotel, which was later described as a simple "courtesy call."

It becomes clear that the plot thickens in the Aberhart camp. Social Credit having proved lopsided and unworkable in a province, some other scheme must be worked up. Something else to secure votes must replace the basic dividend bribe. Observers in Alberta are opening their eyes wide at the simplicity and naïveté of the program. They are wondering what will happen to the Social Credit crusaders of 1935 when they appear in 1939 on the campaign platform to tell the simple-minded folk, who were deceived by Aberhart at wearing gunnysacks for clothing and feeding on gopher meat for food, that their basic dividend dream of \$25 monthly will not and cannot be realized?

It will take more gall and brazenness to get up and explain away 1935 promises and assurances on the strength of a mission from the Almighty than is usually found in the party politician. Remembering the shouting about "God's will and the people must prevail" that was heard before the election of 1935 and, in diminishing crescendo, through the last four years, one is reminded of the printer to whom a typographical error was pointed out in a proof copy of a religious work in which the Almighty was quoted. He said, "There were no spelling rules when Adam lived, God didn't spell like we do."

## Important To Journal Advertisers

WEDNESDAY NEXT, May 24, being a general holiday, advertisers are asked to have copy ready as early in the week as possible. Your co-operation would be appreciated in this request. It being pay week, it is essential that copy should be ready on Monday, in order that The Journal may be published ahead of the holiday of Friday, May 26, which has been declared an additional holiday as well as May 24.

## COMING ON SUNDAY

MOST REV. F. P. CARROLL, D.D., Bishop of Calgary

On Sunday morning Mass will be said at Holy Ghost church, at 8 a.m., following which 45 candidates will be confirmed by Bishop Carroll, and the second Mass will be at 10.30 a.m., when another 45 candidates will be confirmed.

It is anticipated there will be a capacity attendance at each service, and it is likely that Bishop Carroll will arrive on Saturday evening. He will be the guest of Rev. J. T. Dunbar, parish priest.

## ST. ALBAN'S CHURCH

Rev. J. R. Hague, A.Th., Incumbent  
Sunday Afternoon Ascension—10 a.m., Sunday School; 11 a.m., Mattins and Sermon.

Read Matthew 25:1-13.

This parable of the Wise and Foolish Virgins seems to give ground for believing that Jesus expects and will demand from those who have the opportunity a certain specific possession of Heavenward commitments.

What was it that the wise virgins had and the foolish had not? Was it not that inward illumination fed by the oil of Heaven and used to brighten up all the corners of the world?

The Church—that organized society of lamp-bearers for leading men out of darkness into true manhood—either has or has not this inward illumination, and the lamp of the wise Christian must be lit and must be filled, not with any special brand of paraffin, but with the very light of Heaven, and it must be used to illumine this world. The substance of that light of Heaven is called Love.

—Exch.

Next Wednesday is Bellevue's big day—Victoria Day—May 24. Plan to attend.

A poorly dressed salesman is handicapped from the start. Poorly printed stationery has the same effect. Get the best by ordering from The Journal.

Sunday school teacher to class of little boys—"What is a saint?"

Small Boy—"A dead girl with wings."

First Burglar—"Did you get anything?"

Second Burglar—"No, the fellow that lives there is a lawyer."

First Burglar—"Did you lose anything?"

## Keats May Coach Canadians

Former Big Leaguer Here Discussing Contract With President Frank Aboussafy and Local Executive

Though an Edmonton despatch in Tuesday night's papers stated Duke Keats of that city had been appointed coach here, no official confirmation was given up till the time The Journal went to press.

Frank Aboussafy, Canadians' president, stated that probably a contract would be signed this evening, Thursday, and that Mrs. Keats and children would later, with "Duke," take up residence here. During the past season he was one of the official referees of the Alberta senior league circuit.

## Holy Father Launches Peace Crusade

Holy Ghost Parish Accepts Call of Pontiff with Special Fervor

The crusade of Prayer for Peace recently called for by His Holiness Pope Pius XII is being fittingly observed in Holy Ghost church. The Sovereign Pontiff has directed that during the month of May a Crusade of Prayer to the Blessed Virgin Mary be instituted for the intention of obtaining peace and concord among all nations. The Holy Father in a particular manner has invited the children throughout the world to participate in this holy union of prayer.

The faithful of Holy Ghost parish are, as the Holy Father has requested, the children, has accepted this call of the Supreme Pontiff with special fervor during these distressful days. Every Sunday, Wednesday and Friday evenings they assemble in the parish church where the Rosary, Litany of the Blessed Virgin and Prayers for Peace are recited. Through the intercession of the Queen of Peace they seek to gain from the Divine Mercy of God the ardently desired blessing of peace and harmony amongst men of good will.

The prayers of the children the world over, during this month, must certainly bring down God's blessing on those who promote peace. May the fruits of these prayers move our statesmen and diplomats to be motivated by Justice and Charity—the basic virtues on which common sense must be made if the common weal is to be assured.

## F. Aboussafy Now President, Canadians

The annual meeting of the Canadian hockey club, held this evening, heard the financial statement for the past season which showed expenses of over \$13,000, leaving a small balance of receipts over expenditures, though had it not been for about \$1800 obtained from outside sources apart from local revenue, there would have been a deficit. Local admission receipts were slightly over \$8,000, the balance of the \$13,000 being from various sources, including over \$1,000 from a carnival held during 1938.

The president of the past two years, Harry Gardner, though re-nominated, decided to withdraw from the office, and in his place Frank Aboussafy was elected, with the following executive: Honorary president, G. Kellock; vice-president, Albert F. Short; secretary-treasurer, Fred Guerard; executive committee, H. Gardner, W. Fraser, Jr., G. Burchell, M. Stigler, A. Gentile, J. Salvador, R. Graham, A. A. Proulx, J. Lipovsky, G. C. Nurcombe, V. Colossio, James Park, and J. A. McDonald.

A tribute was paid by the retiring president to the efficient work of Fred Guerard, secretary.

Following the close of the meeting, an open meeting was called to order to discuss steps to be taken towards securing public support towards the installation of an artificial ice plant. H. T. Halliwell and W. L. Rippon, president and secretary respectively of the Board of Trade, were appointed.

## COMMENT ON CANDID CAMERA SHOTS

Favorable comment was heard from many quarters on the fine photographs taken by Even Gushul with a candid camera at Blairmore's musical festival and reproduced in last week's edition of The Journal and the Lethbridge Herald.

Not only does Evan take the photos, but he makes the half-tone electrolytes for publication, having installed equipment at heavy expense last year for this purpose. He is to be commended not only for his artistic ability but also for his technique in making newspaper cuts, a very difficult and painstaking job.

## Freemasons Met at Fernie

Rocky Mountain and Summit Lodges of Alberta Represented by District Officers

At the district meeting of Masonic lodges of Eastern British Columbia held on Saturday at Fernie, H. C. Westrup, district deputy grand master of Alberta district No. 4, and W. H. Chappell, past district deputy, were guest speakers. Others from the Pass towns attending were A. F. Short, past district deputy; S. C. Short, M. W. Cooke, Col. R. F. Barnes, all past masters of Summit Lodge; H. T. Halliwell, and Roddy McLeod, of Blairmore. A banquet was served at 6.30, following the afternoon session, and the meeting resumed in the evening.

## EASTERN B. C. PARLIAMENT IN SESSION

The 39th annual convention of the Associated Boards of Eastern British Columbia was held at Nelson on Tuesday and Wednesday, the annual banquet being held at the Hume hotel on Tuesday evening.

## HOME IMPROVEMENTS IN ALL DIRECTIONS

The springtime brings the urge to poets to write, but to the more practical-minded the urge comes to make improvements around their homes. On Sixth street Archie Beveridge is extending his fine masonry wall, and adding thereby to the appearance of his comfortable home; Peter Smith also is building a stone wall around his place, and when the roving reporter of The Journal went over to find how the work was progressing, Peter and his brother Bill remarked they were building a fortification which might be useful. Across the road Bill Anle was industriously planting trees, and if they grow the beauty of Sixth street will be considerably enhanced. There are improvements being made in other parts of town, and increasing pride in home ownership is all to the good.

## CIRCUS COMES TO COLEMAN MAY 23

Baddeley Bros.' circus will be here on May 23, giving performances at 2.15 and 8.15 p.m. A trainload of equipment is carried, and the big top will be erected shortly after 8 a.m. on May 23. The public are invited to witness the unloading and erection. Outstanding acts from the famous Barnum & Bailey and Al G. Barnes shows, with specially imported acts from Europe and the Orient will be presented, including the Balancing Bailleurs in the greatest balancing act in the world; the Flying Stunways in the most sensational revolving ladder act, and other novelty numbers too numerous to mention. A full two hours' program, with extra low admission prices. The entire district should turn out and see this remarkable attraction. One day only!

A rather green young man who was on a visit to the wild and woolly West went into a store to buy a saddle.

"Do you prefer an English saddle or a Western saddle, sir?"

The young man looked puzzled. "What's the difference?" he asked.

"The Western saddle has a horn," said the other.

"I don't think I'll need the horn," said the young man. "You see, I don't intend to ride in heavy traffic."

ed as head of the committee with a dozen other citizens to draw up a plan to submit to the business interests and the miners' association, the town council and the school board, with the intention of making the project a community-wide effort. The committee anticipates organizing its plan of campaign next week.

## Two-Day Carnival Proved Successful

Major Prizes Won by Coleman People—Carnival Crew Awarded Bulova Wrist Watch

Saturday and Monday were gala days (or nights) at the rink, when the town and district of various sports organizations was held.

Visitors from the Pass towns gave generous support, and on Saturday night over \$1,000 was taken in at the various booths. Monday night the attendance was smaller, though a fair return was reported from the booths. The bedroom suite on Saturday night was won by Mrs. Dave Robert, and the Chesterfield suite on Monday night by A. Oliva, both of Coleman.

The handsome Bulova wrist watch awarded by the carnival committee to the girl selling the highest number of tickets on the aid of various sports organizations was won by Winifred Mitchell. Irma McLeod was awarded a case of silverware, and Ruth McLeod an electric novelty lamp.

## More Assessments Being Made

For school and town purposes, assessment on buildings erected or improvements made since the 1937-38 assessment are being made at present by Mr. C. W. May, of Calgary, who in 1936-37 made the assessment for town purposes.

In 1937-38 the assessment for school purposes was made by Mr. Chapman of Edmonton.

Changes in the assessment act regarding schools requires the school trustees to take the town assessment for taxation purposes. Mr. May will probably be here for about two weeks in all.

## Football League Starts May 27 at Fernie

Blairmore, Coleman and Fernie Enter League. Michel Failed to Organize

Crows Nest football will get away to a flying start on Saturday, May 27, at Fernie when Coleman meet the B. C. eleven in the first game of the 1939 season.

A tentative schedule was drawn up at a league meeting at Michel on Sunday, comprising teams from Fernie, Coleman and Blairmore. Blairmore who were not represented, will have to give their assent to the proposed league before it can be put into operation.

The league is divided into two sections, each section calling for the teams to play home and home games. Hillcrest will be invited to play exhibition games and permission is also granted them to enter the second section of the league if they wish to do so. Cup tie games will be played following the conclusion of league play on July 29 when Fernie comes to Coleman.

## FEW AT BIBLE SOCIETY LECTURE

The Bible Society lecture in St. Paul's church last Friday by Rev. Mr. Lytle of Calgary was attended by about a dozen people. It was such a fine evening and other meetings were on that was probably the cause of such a small attendance. The lecture slides on Ethiopia were very enlightening, and the lecture throughout was most interesting and well worthy of a much larger audience.

Taggers were out last Saturday for the Salvation Army and their efforts met with a fairly good response.

Bona-fide circulation of your weekly newspaper is the finest guarantee of real service.

## DOUBLE AUTOMATIC BOOKLET

## Discipline And The Child

The problem of the wayward boy or the difficult girl is an age-old one. There are few families who escape it entirely in the course of a lifetime and in every community there are families in which it is an acute one most of the time until the children reach the age when they must fend for themselves without parental control or assistance.

Up to the age of adolescence, in most cases, the problem does not appear to be a serious one. While the children are quite young they are kept from serious harm apparently without great difficulty, because their actions and even their words and moods are subject to close supervision in the home and the school.

It is those years when boys and girls first experience the stirrings within them of approaching manhood and womanhood that the danger zone is approached. About that time the youth of both sexes are prone to retire within themselves, to nurse their own secrets, to draw away from parental control and, in short, to use a popular term, to live their own lives. They have emerged from the chrysalis of childhood and are eager to soar into an unknown realm.

All that is perfectly natural. The time comes when fledgling birds must leave their nests and the young cuckoo must leave the home lair to fare forth "on their own." This is the most dangerous period in the life of bird or beast. Young and inexperienced and without the strength and wisdom of their forebears they face a world full of terrors which they are not equipped to combat, except for such warnings as instinct may convey and for such lessons as they may have learned from their parents.

It is even so with the young of humankind. They, too, are launched unprepared into a world full of pitfalls, unless they have been equipped to face the dangers of life and with the strength and wisdom which have been enough to train them with an eye to the future and have pursued this difficult task with understanding and sympathy.

## A Difficult Task

And this task is not an easy one, but it is a duty which must be faced by every parent worthy of the name if the resultant product is to be a credit to the family, the community and the nation, and unless this is the outcome, parenthood can be written off as a rank failure.

It is a difficult task because every child represents a separate problem requiring special treatment and that entails careful study and much thought. Even though the educational system tends to press the youth of the country into a common mould they are not born alike and that is too often overlooked both by parents and teachers.

It is a difficult task because training is a continuous process from the time the child is weaned until he or she is ready to leave the shelter of the home roof and that means that method to be adopted must change as to trend always in the direction of the main objective, with such variations as may be necessary to conform to the age, the temperament and the individuality of each child.

As already indicated, the process of successful training commences at the outset of life. It is too late to begin at the age of adolescence. The confidence and understanding between parent and child which is essential to successful training in the teen years has either been engendered or lost by the time that difficult period of life is reached, and if it has been lost by that time it is difficult if not impossible to recapture it.

All of this does not mean that the child must be mollycoddled, nor does it mean that he or she must be ruled by big stick methods. A sure method to turn out a misfit is to allow the child to do what he or she wants on all occasions and at all times. An equally sure way is to repress the child by harsh treatment.

It does not mean that punishment for offences is to be avoided. Children have a keen sense of justice and punishment does not leave a searing sense of resentment, if it is deserved, if it is reasonable and if it is made to fit the offence and if proper account is taken of motive and temperament.

## Corporal Punishment?

Discussions on child training invariably lead to a review of the question of corporal punishment—its use or not to spank. On this phase of the training problem it might not be amiss to quote here what J. D. Griffin had to say on the subject in a recent issue of "Health" in which he offered the following comment:

"What kind of people do we really want our children to become? The various measures we employ in child training are but means to this end. And so I believe it is perfectly possible to raise children so that they develop wholesome, vigorous personalities and become decent, efficient citizens without using corporal punishment at all. It is possible, but it is not without some danger. . . . The occasional spanking may actually be a healthy procedure. It clears the air and relieves pent-up emotional tensions. It frequently leaves the parents with the conviction that they have done their duty righteously. In any event such a procedure is usually far less damaging to the wholesome development of the child's personality than the oppression of continual nagging of parents."

## Know Little About Cards

John Omwake, former president and chairman of the board of the United States Playing Card Company, died in Cincinnati, aged 85. Mr. Omwake, although often described as the world's largest manufacturer of cards, knew no card tricks and had very little knowledge of how to play with them.

animals in the United States, Pennsylvania second and California third.

## IF YOU FEEL SUNK

Read this and cheer up

Are you so blue that life is no longer worth living? Do you feel weary? Do you feel like a depressed man? Then here's good news for you in case you need a good general system tonic. Famous Lydia E. Pinkham's Vegetable Compound. Let its wholesome herbs and roots help Nature build up more physical resistance and tone up your system, so that it can more easily throw off the "blues" and give more energy to enjoy life.

MILLIONS of women have depended upon this "Compound" because it has helped them along to friends and neighbors, and to their children.

Why not take Pinkham's Compound and go "sailing" thru it?

## Years Spent In Writing

Milton planned Paradise Lost when he was 32, brooded over it until he was 50, then spent seven years of blindness on its composition. Gray devoted eight years to his brief Elegy in a Country Churchyard. The Divine Comedy occupied Dante from his 35th year until his death at 66. Goethe wrote the first draught of Faust at 20 and finished the last at 80.

## Fishing For Sharks

Zane Grey's fever for fishing has led him to the point where he recently spent \$3,000 for one reel. It weighs 37 pounds, is 15 inches in diameter, and carries 2,000 yards—more than a mile—of 54 thread line. He hopes to hook gigantic sharks, 40 feet and longer, which he believes to exist in Australian waters.

A gallon of the average material of which the earth is made would weigh 55 pounds. 2307

## A Protective Measure

## United States May Establish Twelve-Mile Zone In Coastal Waters

The state department, it was learned, is investigating the national defence value of establishing a 12-mile zone of territorial waters around the United States.

This extension of the present three-mile limit of coastal control was proposed to the department by Chairman Key Pittman (Dem.-Nevada) of the Senate foreign relations committee. He said officials had advised him the proposition was under consideration but that it was complicated by international questions, since the department would prefer to take the step with other nations.

"If we allow submarine and warships within three miles of our shore during a foreign war," Senator Pittman said, "some of our ships will be sunk. And we don't want war within three miles of our shore."

He said the proposal would have peacetime benefits also, since it would give the United States greater control over the Alaskan fishing banks. American interests there, he declared, are in constant conflict with those of Japanese fishermen who stretch their nets just outside the three-mile limit.

Announcing he did not contemplate offering any legislation unless the state department requested it, Mr. Pittman said the three-mile limit might be extended either by proclamation or by treaty.

The United States set up a 12-mile zone by treaty with Great Britain during prohibition in order to make run-around patrols more effective. That limit was agreed upon because 12 miles was about an hour's run from shore. The three-mile zone dates back to the time when a cannon would shoot about that distance. It long has been accepted in international law as the extent of territorial waters.

## SELECTED RECIPES

## BUTTERSCOTCH FUDGE CAKE

1 egg and 2 egg yolks

2 1/2 cups sifted Swiss Down Cake Flour

2 cups Calumet Baking Powder

1/2 teaspoon salt

1/2 cup butter or other shortening

1 egg, unbeaten

2 egg yolks, unbeaten

3 squares Baker's Unsweetened Chocolate, melted

1/2 cup milk

1/2 teaspoon vanilla

1/2 cup boiling water

Sift flour once, measure, add baking powder, salt and soda and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy.

Add egg and egg yolks, one at a time, beating well after each. Add chocolate and blend. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth. Add vanilla, then add boiling water, beating quickly and thoroughly. Bake in two greased deep 8-inch layer pans in moderate oven (350 degrees F.) 20 to 25 minutes, or until done. Spread Butterscotch Fudge Frosting between layers and on top and sides of cake. Decorate top with pecan halves. Double recipe for three 10-inch layers.

## OYSTER STUFFING

3 cups finely crumbled Shredded Wheat Biscuits (5 biscuits)

1/2 cup melted butter

1 to 3 cups oysters with their liquor

4 tablespoons lemon juice

2 tablespoons minced parsley

1/2 teaspoon salt

1/2 teaspoon white pepper

Mix all ingredients and add a little stock or boiling water, if too dry. Use to stuff a roasting chicken. To stuff a turkey, etc., increase this recipe.

## Alberta Road Plan

Expenditures Of \$625,000 On Main Highways This Season

Dominion-provincial proposals for expenditure of \$625,000 on Alberta's main highways this season have been approved by Ottawa, it was announced by Hon. W. A. Fallon, Alberta minister of public works.

The expenditures approved by the Dominion include \$550,000 to be shared equally by Alberta and the Dominion to be spent on improving and surfacing highways in the central and southern districts of the province.

In addition there is \$75,000, two-thirds of which will be contributed by the Dominion and one-third by Alberta, for mining roads developments.

## Used Same Flag

The Eiffel Tower in Paris is 50 years old. To celebrate the occasion, the flag that was hoisted at its summit 50 years ago was run up. It was hoisted by M. M. Franco-Carmel, who 50 years ago performed the same ceremony at the inauguration.

The Dominion of Canada supplied about 50 per cent. of the asbestos from which the earth is made world best market for the product.

## Means Huge Saving

## Great Britain Finds Fast Time Is Invaluable To Country

Although time-pieces of a kind have been known for about 2,000 years, the first being the sundial and the second the "clepsydra," a device like an egg-blower through which water dripped, clocks did not come into general use until around the year 1700. But as man governed his hours by daylight and darkness there were world-wide variations of time, and even in the enlightened British Isles there was much difference and confusion less than a century ago, there being no standard times, cities establishing their own times and only the railways operating on Greenwich time. The real inventor of regular times was the Scottish-born Canadian, Sir Sanford Fleming, chief engineer of the Canadian Pacific Railway, who propounded his scheme in 1878.

It was not until an international conference in 1884 that his plan was universally adopted, and on this side of the Atlantic five time zones were established and in Europe there are three—Greenwich, mid-European and East-European.

Daylight Saving was the invention of William Willett, London builder, who enjoyed a morning ride in the woods near his home in Kent, and regretted that so many people should be asleep when the sun was shining so beautifully and retired indoors in the evening because of early darkness. He promoted his plan in 1908, but it did not live to see it accepted, and it was not until the World War, when the need arose for conserving our resources, that the British Government made it compulsory. Inauguration took place on May 21, 1916.

The idea is permanent there now and it is estimated that the saving of daylight during each season is about 100,000 hours, amounting to \$15,000,000. That must be added in considerable benefits in outdoor exercise and health.

## Total Sum Is Large

Federal Government Has Paid \$345,801.70 For Relief In Nine Years

Federal relief distribution since the first relief act was passed in 1920 until last March 31 totalled \$345,801.70, exclusive of loans to the provinces. It was shown in a report tabled in the House of Commons from the Dominion commissioner of unemployment relief, Harry Herveford.

Included in the total are many sums spent by Federal departments but the larger share is made up of grants to the provinces.

Grants to the provinces of unemployment relief from 1920 to last March 31, were: Prince Edward Island, \$126,116; Nova Scotia, \$7,553,963; New Brunswick, \$5,221,544; Quebec, \$56,837,334; Ontario, \$91,212,025; Manitoba, \$24,134,629; Saskatchewan, \$52,791,144; Alberta, \$16,841,811; British Columbia, \$24,265,668.

Appropriations to the Department of Agriculture under the various relief acts have totalled \$28,026,087 since 1920, more than \$21,000,000 being spent in 1927 when drought conditions in the West were acute.

A source of poultry food is derived from the flesh of sharks.

of the famous Scottish liners "ATHENIA" and "LETITIA" to England, Ireland and Scotland

Following the policy of keeping "abreast of the times", the Donaldson Atlantic Line have thoroughly reconditioned and improved the accommodation in all three classes of these vessels.

The new features include:—

- Hot and cold running water in all Cabin and Tourist staterooms, and in most Third Class cabins.
- Beds instead of berths.
- Controlled ventilation throughout.
- Enlarged and rebuilt cabin staterooms in "Athenia".
- New rooms with private bath on the "Athenia" following similar improvements made in the "Letitia".

## NOTE THESE LOW RATES

Cabin from \$132.00; Tourist \$218.00; Third \$91.00

Weekly sailings from Montreal to Belfast, Liverpool and Glasgow in conjunction with the Cunard White Star liners "Andania" and "Antonia".

## Crew Will Number Seven

On the Trans-Atlantic Clipper there will be a crew of seven not counting the stewards: A captain, first officer pilot, second officer pilot, third officer pilot-navigator, engineer officer, radio officer and a junior flight officer.

There are 74,000 acres of cultivated land in Canada, 55,700,000 acres of which are in the Prairie Provinces. Range and unimproved pasture land in Canada comprises 40,000,000 acres, 33,000,000 acres being in the Prairie Provinces.

Germany is reported to be buying horses for its cavalry, having found mechanized transport unsatisfactory.

First lit in 1808, a peat fire has been burning constantly in a wayside inn on Dartmoor, England.

## Rescue Awards

Parchment Certificates Issued For Rescuing People From Drowning. Awards of parchment certificates for rescuing persons from drowning to two persons in Manitoba are announced by the Royal Canadian Humane Association. The awards go to Annie Margaret Elviss, Swan River, who saved Richard W. Zinger from drowning at Swan River, Aug. 10, 1935, and Joseph H. Hall, Selkirk, for the rescue of Rosie Riffin, whose life was in danger in the Red river at Selkirk, July 16, 1935.

Allison Clifford Fawcett, of Rainy River, Ont., also got an award for the rescue of Clifford van Norman from drowning at Rainy River, Oct. 2.

There is no fun in being the granary of the world if the other countries will not buy our wheat.

# Hitler Inspects Reich's Formidable Defences On Belgian Border

Berlin.—Reichsfuehrer Hitler, accompanied by leading military officials, started an inspection of Germany's formidable fortifications near Aachen on the Belgian border.

The fuehrer journeyed overnight from Munich and then drove into the countryside about Aachen to study in minute detail the German defences along the western frontier.

Observers said it was the beginning of a "demonstrative inspection" by which Germany sought to remind the world of the vastness of her military resources.

In diplomatic quarters it was regarded as more than a coincidence that Hitler started his study of frontier defences on the day Mussolini began a week's tour of Italy's frontier region with France.

Diplomats said the world was being shown that Italy and Germany do work together and that this was the first evidence of the closer military co-operation contemplated by the new pact of Milan.

The fuehrer was met at Aachen, 44 miles southwest of Cologne, by Colonel-General Wilhelm Keitel, chief of high command of the armed forces.

It was stated the object of the fuehrer's visit was to inspect fortifications which have been finished and "new works which are about to be completed."

The fortifications, a portion of which Hitler saw, are regarded by Germans to be impregnable.

(The fortifications known as the "Limes" line, stretch along the German frontier with Switzerland, France, Belgium and the Netherlands.)

Since last October improvements have been made steadily so that some military commanders now are saying that, sheltered by a wall of steel and concrete in the west, Germany can give her "undivided attention to problems of the east."

The presumption was that these eastern problems were to be next on the German military and diplomatic program.

## Bren Machine Guns

Expert Says Manufacture To Be Carried On Extensively In Canada

Ottawa.—Manufacture of the Bren machine gun will be carried on just as efficiently at the John Inglis Company, Limited, Toronto plant as at the Royal Arsenal at Enfield, England, George Gillespie, the company's chief engineer, told the public accounts committee.

Gillespie was, until last summer, a technical expert at Enfield but was released ahead of retirement in order that he might direct performance of the Canadian company's contracts for delivery of 7,000 Bren guns to Canada and 5,000 to Britain.

"I am confident rejections will be no higher here than they are at Enfield," he said.

# Flames Destroy Five Huge Grain Elevators In Fire At Chicago

Chicago.—A series of blasts and roaring flames destroyed five huge grain elevators, wiped out all traces of eight missing men and caused damage in excess of \$3,000,000.

The fire—most serious in Chicago since the \$8,000,000 stock yards conflagration of May 19, 1934—raged for five hours before it was brought under control by 400 firemen.

Even then the heat from the charred ruins was so intense officials could not approach them to confirm fears eight workers had been trapped and killed in elevator "A" of the Rosenbaum Brothers Grain Company.

Eighteen men—13 firemen and five workmen—were rushed to hospitals. Eight of them were in serious condition.

Fire Marshal Michael Corrigan estimated loss in property alone at \$3,000,000. Uncalculated for the time being was the value of more than 3,500,000 bushels of grain stored in the structures.

An explosion, believed caused by dust, touched off the blaze in elevator "A" of the Rosenbaum firm in the heart of the city's largest grain district at 102nd street and the Calumet river. The roof of the building, 146 feet high and covering an area of a half square block, blew

## No Need For Alliance

That Appears To Be The Feeling In Soviet Union

Moscow.—Foreign observers discussing the slowness of British-Soviet negotiations pointed out that pledges by Great Britain and France to Poland and Rumania have lessened considerably Russia's need for an alliance in the west.

It was contended the real point at issue was not whether Moscow still had doubts as to British and French sincerity but rather what Joseph Stalin thinks would be to the advantage of the Soviet Union.

Some observers were inclined to think Prime Minister Chamberlain's House of Commons statement on the negotiations was calculated to establish quickly whether Russia was inclined to co-operate with France and Britain in a security front. Others asked why Stalin should promise to join any fight at all.

It seemed clear that if Germany should become involved in hostilities to the east she now could not drive through Poland or Rumania toward the Soviet Ukraine without clashing with Britain and France. That was not the case several months ago.

Stalin no longer needs to consider possibility of a joint Polish-German drive toward the Ukraine, for Poland now is in the camp of Germany's rivals, it was argued.

## Court Etiquette

Demand For Books On Subject At Edmonton Public Library

Edmonton.—There has been a steady demand for books on court etiquette and presentation officials of the Edmonton public library reported, adding that at present they have not a single one left on their shelves. The demand has come from people "just curious to know." Civic and provincial officials likely to be presented to the King and Queen here June 2 "are getting their lessons in private," one official explained.

Heaviest demand at the library recently has been for biographies of the King and Queen.

## Increase In Immigration

Largest Number Of New Citizens Came From United States

Ottawa.—Figures released by the immigration department disclosed the number of immigrants to Canada in the 1938-39 fiscal year ended March 31 totalled 17,128, compared with 16,645 the previous fiscal year, an increase of 9.5 per cent.

Of the total, 5,663 came from United States compared with 5,463 the previous year and the number from the British Isles was 3,373 against 2,972 while 1,366 were of the northern European races against 1,182. Other races accounted for 6,726 against 5,848.

## From Across The Border

Invasion Of United States Visitors To Greet The King And Queen

Winnipeg.—From the tip of the Dominion's chain of Great Lakes to the ponderous Rockies, empire flags and royal colors waved to-day along the royal routes King George and Queen Elizabeth will travel to be greeted by western Canada's populace and the greatest invasion of United States visitors in the west's history.

Mingled with throngs from northern Ontario and prairie cities, towns and villages will be thousands from Wisconsin, Minnesota, North Dakota and Montana, where enthusiasm over the initial appearance of an empire monarch in the Dominion is steadily increasing. Private citizens have been urged to do their utmost in caring for the Americans because hotel space likely will prove insufficient.

City officials in Minneapolis and St. Paul have asked Winnipeg to arrange for their townfolk vantage spots from which the King and Queen can be seen. Mayor C. W. Cox, of Port Arthur, recently returned from a visit across the border with warnings that his home town could prepare for a huge influx from Wisconsin.

Winnipeg, where Manitobans from towns, villages and farms will cross the boundary by train, auto and bus, Regina which figures on 100,000 persons pouring into town on royal visit day, estimates a large proportion will be from United States.

Mayor John Queen and Alderman John Blumberg of Winnipeg, after scanning requests and queries, left for the mid-west states to extend invitations and arrange to meet the demands which fall on the Manitoba capital when playing host to Their Majesties May 24.

In special stands being erected on the edges of royal procession lines, seats will cost as much as \$5, according to present estimates. In Winnipeg from \$3 to \$5 will likely be asked while Regina's reserved areas are expected to call for \$1 a person. Tickets for vantage points during the royal visit to Fort William and Port Arthur, May 23, have been purchased in Duluth, Minn., and other areas along Lake Superior for \$150.

A choir of 150 Fort William school children will be heard by the King and Queen when they pause for three minutes before 10,000 youngsters at the lakehead and the musical program will include selections by the Duluth symphony orchestra or 80 musicians.

So that every citizen will have the opportunity to attend the memorable event, Winnipeg police have lent a kindly hand in finding a special spot for 250 blind persons. Guides will describe the scenes as the royal party passes by and chairs will be provided for the elderly sightless.

## Acrobates Banned

Calgary.—Col. David Ritchie, Calgary's chief of police, issued a statement that no acrobate will be permitted to land or fly within three miles of the royal party during Their Majesties' visit here May 26. Visiting planes must avoid the city en route to the airport, he said.

A Hampshire farmer was awarded \$60,000 compensation when his farm was compulsorily acquired by the British Air Ministry.

## OPERATES UNDER THREAT

Dr. Sigmund Hirschfeld, who was forced to dig out a bullet with a razor blade after Orville Watson, an alleged bandit, was wounded by police. Watson's friends levelled guns at the doctor, above, while he performed the operation.

## On Royal Train

Sixteen Telephone Instruments, But No Number Thirteen

Montreal.—There will be no telephone local number 13 on the royal train.

Ranging from more modest types to the King's personal gold-finished hand set, officials said, 16 telephone instruments will be carried by the 12-car train bearing their Majesties across Canada. Thirteen locals, numbered from 1 to 12, and 14, will permit car-to-car communications.

A special switchboard will be set up in the baggage car, and no women operators will be on duty except at certain daytime stopovers. There will be six phone instruments aboard the pilot train, carrying newspapermen and officials.

## House Will Not Prorogue

Adjournment To Be Made During Royal Visit To Ottawa

Ottawa.—A short adjournment of parliament during the King's visit to Ottawa, rather than a long adjournment over the whole of the royal stay in Canada is now the intention of the government, Prime Minister King told the House of Commons. He said it was clearly impossible to complete parliament's business in time for prorogation by the King but with elongated sittings could do so shortly after the King leaves Ottawa.

## Decoration For Prince

Berlin.—Chancellor Hitler bestowed the grand cross of the German Eagle, highest German decoration, upon Crown Prince Michael of Rumania. The award was interpreted in political circles as a move to create pro-German feeling in Rumania now the country has concluded a trade agreement with Germany.

IT WAS A HEAVY BUDGET BUT THE CHANCELLOR SMILED

Sir John Simon, British astute Chancellor of the Exchequer, carried a very heavy budget over to the House of Commons this year, and it will cost the British public a mint of money, but Sir John still had a smile on his face when he left the Treasury with Lady Simon.

# Great Britain Reaches Accord With Turkey To Resist Aggression

London.—Great Britain brought Turkey into the lengthening chain of nations pledged to resist aggression and thereby scored a victory over Nazi diplomacy.

Conclusion of a mutual assistance pact between Britain and Turkey was announced in the House of Commons by Prime Minister Chamberlain, who said negotiations were continuing between the two countries for a "definite long-term agreement of reciprocal character in the interests of their national security."

In the meantime, Britain and Turkey are pledged to aid each other in event of an act of aggression leading to war in the Mediterranean area. Thus the near-eastern republic joins France, Poland, Rumania, Greece and Britain in the anti-aggression concert.

Announcement of the agreement brought to an end a contest of diplomacy in which Germany attempted to checkmate Britain's aggression front.

Franz von Papen, pre-Nazi chancellor of Germany and now Chancellor Hitler's foremost diplomatic trouble-shooter, was given the task of preventing the Ankara government from joining the peace alignment. However, the man who set the stage for the Austrian Anschluss couldn't persuade the Turks to trust Germany rather than Britain.

It is understood here von Papen had all sorts of inducements to offer in attempting to persuade the Reich's Great War ally not to join forces with Britain. He was sent to Ankara a month ago.

Meanwhile negotiations are proceeding between Moscow and London for Russia to join the peace bloc and the British government is confident the Soviets will enter.

Russia, too, was understood to have laid foundations for an agreement with Turkey during the visit to Ankara recently of Vladimir Potemkin, Soviet foreign vice-commissar, who will meet Viscount Halifax and Foreign Minister Georges Bonnet of France in Geneva, to discuss the anti-aggression bloc.

The prime minister's announcement that Turkey was the anti-aggression bloc along with Britain, France, Poland, Rumania and Greece.

The prime minister said the "two governments recognize it also is necessary to establish security in the Balkans and they are consulting together with the object of achieving this purpose as speedily as possible. "This arrangement does not pre-

clude either government from making agreements with other countries in the general interests of the consolidation of peace," the prime minister added.

Turkey, occupying a strategic position in the eastern Mediterranean, is looked upon in Britain as a valuable ally in the event of war. She controls the Dardanelles, entrance to the Black Sea, and is in a position, if necessary, to come to Britain's aid in defence of Palestine and Egypt.

Turkey has a land army of nearly 200,000 men, a trained reserve, an air force with an estimated 600 planes, which she hopes shortly to increase to 1,000, and she has been at work remilitarizing the Dardanelles. The reserve force includes women who, since their emancipation, are liable to military service.

In the Great War Turkey sided with Germany. But President Ataturk became British in his sympathies after he had ousted the sultan. When Ataturk died last November, he was succeeded as president by General Ismet Inonu, Ataturk's right-hand man and prime minister for 13 years.

Germany is her best customer and recently she obtained German credits of 120,000,000 marks (about \$60,000,000). Britain has granted her credits of 10,000,000 (about \$46,000,000) apart from credits of 16,000,000 (about \$28,000,000) for armaments. Italy has resumed her purchases in Turkey.

## Conscription Bill

Northern Ireland Excluded From Provisions As Well As Citizens Of Dominions

London.—The House of Commons approved an amendment to the compulsory service bill which excludes Northern Ireland from the bill's provisions. The vote was 261 to 21.

Other amendments tabled by the government made sure that Canadians and citizens of other dominions and the colonies are exempt from compulsory service, and give the government power to bring back from foreign countries all British subjects who come within the bill's provisions.

## In Event Of War

London.—Plans for establishment of four large blood storage plants in London for use in transfusions in event of wartime bombings were disclosed in the quarterly published by the Red Cross.

# Germany Is Warned Not To March On Free City Of Danzig

London.—Leaders of the British and French nations gave unmistakable warnings to Germany not to march on the Free City of Danzig—Europe's No. 1 danger point.

In London Prime Minister Chamberlain declared Britain was ready to go to war over Danzig to insure Poland's independence and warned that "no more deadly mistake" could be made than for any nation to suppose that this country will go back on its promises.

In Paris, Premier Edouard Daladier threatened to increase France's already reinforced army unless the totalitarian states cut down their mobilized forces.

Both leaders expressed willingness to promote peaceful settlement of dangerous problems, but they left no doubt of their intentions to meet force with force.

Meanwhile it was reported that Ivan Maisky, Soviet ambassador in London, and Foreign Secretary Viscount Halifax had made progress in clearing away any misunderstanding or suspicious extremes between London and Moscow over Britain's efforts French anti-aggression bloc. Unofficial circles reported they were agreed upon general principles and some sort of alliance might be expected "reasonably soon."

Mr. Chamberlain declared Britain's readiness to go to war over the free city of Danzig "if any attempt were made to change the situation by force in such a way as to threaten Polish independence."

He also contradicted sharply Chamberlain's assertion that "war against Germany was taken for granted" in London.

Chamberlain again disclaimed any intention of "encircling" Germany.

He also contradicted sharply Chamberlain's assertion that "war against Germany was taken for granted" in London.

Instead, he said, Britain was "as ready as ever to listen to the views of others but determined not to submit to dictation."

He declared his willingness under certain conditions to open the broadest sort of negotiations with Germany—economic or for disarmament.

Mr. Chamberlain said Britain's assurances to Poland—to aid in resisting any vital attack on her independence—"are clear and precise."

In declaring this nation's earnestness in its efforts to construct a "peace front," Mr. Chamberlain referred to a conversation with Leon Blum, former Socialist premier of France who visited London recently. Blum told him, he said, that "the only danger of war in Europe—a very real one—is if the impression should go abroad that Britain and France were not in earnest and that they could not be relied upon to carry out their promises."

(Britain and France have given pledges of aid to Poland, Rumania and Greece.)

"If that were so," the prime minister said, "no greater nor more deadly mistake could be made. It would be a frightful thing if Europe were to be plunged into war on account of a misunderstanding."

These words were interpreted as meaning that Britain and France were not only for Soviet Russia, Germany but also for Soviet Russia.

Teacher: "What is the interest on a thousand dollars for one year at two per cent? They, pay attention!"  
They: "For two per cent I ain't interested."

## NOTES AND COMMENTS

SATURDAY afternoon really should be a holiday for everyone, but for retailers in the smaller centres it is the busiest afternoon of the week. Farmers wives come into town to do the week-end shopping, while the husbands do their business around town and have the odd glass of beer. In Coleman the miners have a holiday all day, (without pay, of course) so that the stores are far busier than on ordinary week-days. Every second week, being pay-day, there is a grand field day around the stores, and clerks are busy from dewy morn till late eve, parceling goods and sending them to the homes.

SEEING so many delivery trucks (every store has one) brings the thought that a union delivery service could perform the work at far less cost, and at a saving to the consumer. It is an expense which must be added to the cost of the goods or the merchant must absorb it. Two delivery trucks timed to deliver on regular schedules throughout the day could do the work which nearly a dozen light trucks are now doing. It has worked successfully in other places. As it is now, someone will telephone for a spool of cotton or a bar of soap, and want it delivered as quickly as possible. However it is a merchant's problem, but it could be solved with a little co-operation.

THE long-drawn out efforts of councils and boards of trade of the Pass towns has at last brought from the provincial government the assurance that the highway from Bellevue to west of Coleman will be surfaced. Work cannot commence too quickly, for the dust hazard is very bad at the present time, and will become worse as the season advances. The work should not be allowed to drag till late in the season. It should be commenced "NOW." People of the Pass towns have paid sufficient in licenses and gasoline tax to have surfaced the road several times.

NEW ideas, provided they can be applied in a practical way, make for progress. But so many crackpot theories are thrust before the public that instead of helping humanity they simply confuse and magnify their supposed grievances. The latest is Mr. Herridge and his "New Democracy." Just what this might be it would be difficult to define. As well talk of a new race of people, for there is only one type of Democracy, whereby the people elect their representatives by secret ballot, without intimidation or dictatorship.

OUR experience in Alberta of a so-called New Democracy indicated that it tended towards a dictatorship and press control. We defend the party system of government as being the best safeguard of Democracy, and the freedom of the people. The meaningless oratory by those who would substitute evils we know not of is mere propaganda, often for the purpose of selfaggrandizement, and to distract attention from their own failures to institute the reforms they so freely boasted could so easily be put into effect.

THE men in public life who should be given serious attention are those who are really

trying to alleviate the burden of taxes. It accomplishes nothing to rave about "money barons," and obstruction. There is truth in the observation that if money were to grow on trees, the smart birds would soon get it. Yet we have half-baked economists urging governments to print a hundred millions in new money. Why stop at a hundred?—might just as well go on without limit if money can be produced by just running it off a printing press. We could make oodles of it right in our own printing plant but what value would it have? No more than any other kind of printing press money.

WHICH reminds us—how are the government vouchers circulating? How is the "baby bank" at Blairmore doing? How many from Coleman have opened accounts? There is an excellent opportunity for those who believe in new monetary and credit theories to try them out by supporting the provincial government banks—and they should certainly back up their belief by turning in all the business they can to the treasury branches.

IN QUITE a number of towns it is noticed that reductions, though small, have been made in municipal taxation. In Coleman, through property outside of the town limits being reduced in assessment for school purposes last year, a heavier proportion of taxation for school purposes has been imposed on the householders and business men in town. Another assessment on personal property for school purposes is being made in the town. Local taxes are already high compared with larger places, so that one might say the limit has been reached, for it is impossible to collect taxes beyond the ability of the property owner to pay. Even under present values, householders pay what is equal to a fair rental value in taxes on their homes.

## MISCELLANEOUS

Reciprocity in business is mutually helpful. That's why it is good business to have your printing and advertising done by The Journal.

The Village of Creston has purchased 3,000 gallons of oil for dust abatement.

The Standard, of Strathmore, Alta., published by Mrs. A. H. Moore, issued a 24-page number commemorative of the visit of the King and Queen. It is indeed a highly creditable edition for a town of that size, and a generous share of advertising was carried by local business men as well as a number of city houses.

## SPICY NEWSPAPERS

Outside Jimmy's Coffee Shop the daily newspapers are dropped in bundles for the delivery boys to pick up. Sometimes the dogs beat the boys and come around to get a first-hand sniff at the news and leave their own little bulletins as well.

Typewriting is so largely used now that handwriting has to be exceptionally good to command attention. Most handwriting gives one a pain to try and read it. With portable typewriters being priced on an easily paid installment plan, it is comparatively easy to purchase. Get details from The Journal, local dealers.

During a political campaign in the States, a candidate strode into a newspaper office.

"Look here," he cried, "you've been printing lies about me in your paper."  
"That's right," replied the editor cheerfully. "I know that, but what would you do if we told the truth about you?"

Siberian Ice Cream

## THE JOURNAL IS BEST

The Journal is the best printed and best advertising medium, with a paid-up circulation. People read it because they are willing to pay for it. Bon-fide paid up circulation is the best from an advertising standpoint. Anything given for nothing is valued accordingly.

## Bellevue Band Here Friday Night

New English-Made Band Uniforms to be Worn For Coleman Engagement

A first class band concert and the opportunity of viewing the West Canadian Collieries band in their new smart uniforms of khaki and gold, will be top of the list Friday night in the Coleman Community hall. The Blairmore United church choir will also be in attendance, and will render some very fine choral pieces.

The program is in aid of the Salvation Army "Self-Denial" fund. A silver collection will be taken.

Captain F. B. Hewitt of the Salvation Army will be supplying the pulpit at Michel United church next Sunday at 7:30 p.m. in the absence of Rev. Donald M. Burns, who is attending the New Westminster conference. Mrs. Captain Hewitt will be in charge of the Coleman service.

## Rebekah Assembly President Here Last Thursday

Mrs. Webb, of Calgary, president of the Rebekah Assembly of Alberta, paid her official visit to Victoria Rebekah Lodge No. 7 here on Thursday evening. A number of visiting sisters were present from Blairmore and Bellevue. Degree work was exemplified. During the evening Mrs. Russell Vincent was installed as D. D. P.

Mrs. R. Dunlop, first vice-president presented Mrs. Webb with a purse on behalf of the members of Victoria Rebekah lodge. While in Coleman she was the guest of Mrs. George Duffield jr.

## Holiday Hours At Post-Office

On the king's birthday, Saturday, May 20, the wickets in the post-office will be open for one hour only, 9 to 10 a.m. May 24 Victoria Day, the wickets will only be open for one hour, same time as above.—F. H. Graham, Postmaster.

## Church of the Nazarene

Sabbath school 11 a.m., service at noon. Street meeting 6:30 p.m., front of Coleman hotel; 7:30 p.m., evangelistic service, Miss Thomson in charge. Prayer meeting Tuesday 7:30 p.m. Bible study Friday at 7:30 p.m. Friday at 4 p.m. Junior Missionary Society meeting.—Rev. C. Helen Mooshian, pastor.

## Local News

Michel police found it necessary to stop a number of speed fiends on Saturday night.

Work started Monday morning to paint both the interior and exterior of Sam's Service Station.

The Canadian National service is good, but the deficit is ghastly, comments "Railway Facts."

Mr. Robert Wilson left Coleman last week for Victoria where he may take up permanent residence.

Mrs. Archie Malcolm and daughter Leona, of Lethbridge, were the week-end guests of Mr. and Mrs. C. D. Rogers.

\$71.50 was collected by The Salvation Army on their tag day, last Saturday, an increase of \$2.00 over last year.

Mr. and Mrs. Jack Hoggan and family, and Mr. and Mrs. A. Beveridge and Betty motored to Calgary over the week-end.

Mr. and Mrs. W. Martland, Mr. and Mrs. Harold Turner and Mr. and Mrs. T. Rose motored to Calgary and Cochrane over the week-end.

A party of ladies of one of the bridge clubs wound up an enjoyable season's play by journeying to the Greenhill Grill for a chicken supper on Tuesday evening.

Mr. William Norman, of Burnaby, B. C., was a visitor with Mr. and Mrs. J. Wilson, Seventh street. He is a brother of Mrs. Wilson, and will spend a few days at Pincher Creek.

Mr. and Mrs. Borden MacAulay were the guests of Mr. and Mrs. Norman MacAulay this week. They were on their way home from a honeymoon trip to San Francisco, returning to their home in Drumheller.

80-mile an hour cars on 40-mile roads and 20-mile an hour drivers are the cause of so many car accidents, according to one observer. Human carelessness is undoubtedly the biggest factor.

A recent issue of "The Clarion," published in Toronto, contained a photograph of the Blairmore town council, with a streamer heading and accompanying article, entitled "Blairmore, Alberta, a Living Lesson for Labor."

The Cubs entertained their mothers last Friday in St. Alban's parish hall, bringing sandwiches and other refreshments, which they served like little gentlemen while mothers enjoyed the novel experience of being waited on by their sons.

Grace Chow and brother Louie, daughter and son of E. L. Gooley, Coleman's pioneer laundryman, who were born here, and six years ago went to China, have returned to Coleman, and are staying with their father. They went to Coleman schools before going to China. Mrs. Gooley is still in China, with younger members of the family.

Order your printing and advertising matter from your local printing office, which employs local workers who pay local taxes and buy from local stores. Outside firms and purveyors of questionable methods of advertising take all they can and give nothing in return. It is good business to deal with your home town newspaper and its workers.

Inspector H. Darling, R.C.M.P., Lethbridge, and Sergeant J. A. Cawsey, of Blairmore, attended the funeral of Superintendent Scott at Calgary, whose body was brought from Prince Edward Island, where he died last week. At one time he was in charge at Blairmore, and he was a very popular officer, having a long record of service, commencing with the South African War of 1899-1902.

## Attention Folks!

AMONG the flood of advertising media, good, bad and indifferent, it is widely recognized by experienced advertisers that the local newspaper is the most efficient, because it is bona-fide and paid for by people who really want it.

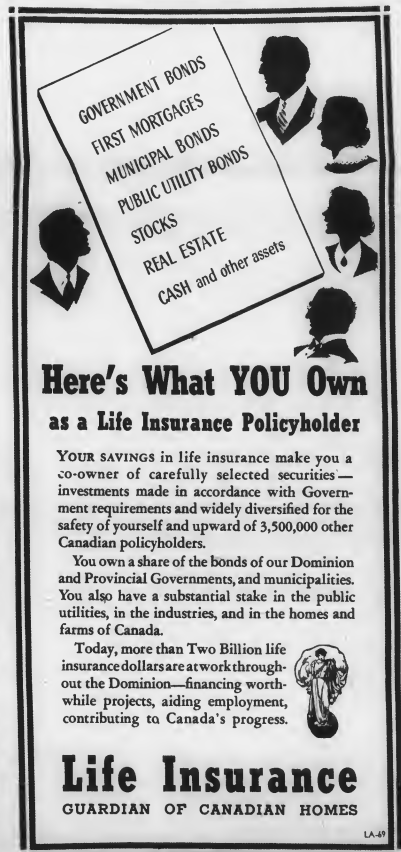

POSITIVELY it is the best builder of Customer Goodwill.

CONSISTENTLY advocating home trading and the development of local industry, THE WEEKLY NEWSPAPER LEADS and continually strives to create greater interest and civic pride in the community.

## For Eczema - Skin Troubles

Take your mind today that you are going to give your skin a real chance to get well. Do to any good drug store and get the original bottle of Moore's Eczema Oil. It lasts many days because it is highly concentrated.

The very first application will give you relief—the itching of Eczema is instantly stopped—eruptions dry up and scale off in a very few days. The same is true of itching Tinea and Feet. Moore's Eczema Oil cures all other skin troubles.

Remember that Moore's Eczema Oil is a cheap, powerful, penetrating Antiseptic Oil that does not stain and leaves a creamy residue. Complete satisfaction or money back.

## WORLD HAPPENINGS BRIEFLY TOLD

Four hundred Arabs have voluntarily listed themselves as ready to defend the British Empire in the event of war in the Mediterranean.

The Scottish Development Council announced it would send exhibits this year to the Canadian National Exhibition at Toronto.

A French military court sentenced a 24-year-old Frenchman and a German-born widow to 20 years imprisonment as spies for Germany.

The King and Queen have granted Ontario's request that a new "super highway" between Toronto and Fort Erie be named "Queen Elizabeth's Way".

Bills aimed at giving greater protection to workers in the mining industry provided the chief business this year of the Yukon territorial council.

A very thorough rescuer is Frank Duggan of Guelph, Ont. After pulling Margaret Proctor out of the Speed river, he plunged back again to bring her roller skates.

A cave deep underground will house historic film records belonging to the British national film library in event of war, it was disclosed. The library's films go back to the Boer war.

At Washington, Cordell Hull, secretary of state, asked a convention of military physicians from all over the world to join him "in an appeal to all peoples to do their utmost in bringing about the day when the horrors of war will disappear."

Lord and Lady Runciman, en route to England from Australia, entertained Mr. and Mrs. W. K. Runciman and their two children, at Banff, Alta. W. K. Runciman, a rancher near Petukia, is a cousin of Lord Runciman.

### Time In Air Limited

Pilots In England Only Permitted 125 Hours Each Month

The following article by Viscount Forbes appeared in the London Sunday Express.

To pilot a plane across the Atlantic is a great strain. This is due partly to the fact that an airplane is flying in an unnatural element.

If the engines of a ship fail it will still float.

If the engine of a car breaks down it remains stationary.

In an airplane you cannot stop, not even to think. The failure of all your power plants, though unlikely, means disaster.

In England air-line pilots are only permitted to fly 125 hours per month. Pilots who do more than this are apt to become tired and depressed.

Flying in much bad weather makes many a pilot surly and bad-tempered, and gives him a detached feeling from his fellows.

Even stewards are affected by long hours in the air. An air line in England tried to work their stewards eight hours a day and in a few months they were all on the verge of collapse.

I suppose that the captains of Trans-Atlantic planes will receive a large salary. A captain in an Imperial Airways flying boat receives about £1,500 a year.

### Best Of All Exercises

Nothing As Beneficial As Brisk Walk, States Professor

Bounding out of bed at 6 a.m. and going through the daily dozen is not the secret of a healthy constitution, according to Dr. Donald Matthews, biology professor at Westminster College, New Wilmington, Pa.

"A brisk walk in the open air is worth 20 gymnasium workouts," Dr. Matthews believes, while strenuous daily exercise "probably does more to break down the body than build it up."

Regardless of age or sex, walking is the best of all exercises, the biology professor says.

The commercial production of onions in Canada occurs principally in Ontario, Quebec, and British Columbia.

When you tell the truth, you don't have to remember what you said.

### Atlantic Fisheries

Average Yearly Income Of Fishermen Said To Be \$190

Drastic decline in Canada's salt fish export trade was responsible for the government's decision to set up a salt fish marketing board, said Hon. J. E. Michaud, fisheries minister.

At one time production of salt fish from the Atlantic coast ranged between 50,000,000 and 70,000,000 pounds a year, nearly all of which was exported, Mr. Michaud said.

That was before the war and since the war a decline had set in. Last year production was at the low level of 19,000,000 pounds.

In 1927 and 1928 the price of dry salt fish was \$6.50 for 112 pounds, and last year the price was \$3.35, less than the cost of production. Some 20,000 people were dependent on the trade.

The fishermen averaged \$190 a year from their only possible occupation. In the last 10 years the industry had been investigated by provincial authorities and social agencies, which had almost unanimously held that some help was necessary if the industry was to continue.

### Has Had Enough

Native Of India Finds Living Near Jungle Nerve-Racking

While an Indian named Valentine was going home in the cool of the evening on the outskirts of Batu Pahat—a township in the State of Johore about 75 miles from Singapore—he heard a soft pattering behind him and looking round he discovered that a full-grown tiger was following him.

Valentine took to his heels with the tiger loping after him. He managed to outstrip the beast, which eventually turned back into the tangled jungle skirting the road and disappeared.

Valentine reached his home considerably shaken by his experience and decided to lie down for a time—only to discover a snake curled up in the middle of his bed. He is reported to be looking for a new home where his peace is likely to be disturbed by the local fauna.

## Gardening

### Spread Out Savings

Experts not only caution against too early sowing of vegetables, but they also advise not to stop too soon. There is no reason why plantings cannot be continued in most parts of Canada right through until July. This will spread the harvesting season over an equally long period with vegetables always fresh just coming to maturity.

Beginners are advised to divide the garden into three parts, sowing a third as soon as weather permits, a third a little later, and the balance at the end of the planting season. In this way if frost does cut down the first batch there will be more seedling coming on.

A Green Or Brown Window Box. Such a box overflowing with gaily blooming flowers is within the range of almost every person. Lack of ground space does not matter. Even the lofty apartment dweller is able to satisfy a gardening ambition. Success is easily obtained provided two or three points are kept in mind.

This sort of gardening is highly intensive with many more plants to the square foot than would be frequent application of chemical fertilizer. Being the season. Being exposed on all sides to drying winds, thorough watering once a day of the window box is advised.

In Using Fertilizer Care should be taken in the use of any commercial fertilizer that it does not actually touch roots or foliage. In the dry state it is liable to burn. Authorities usually play safe and dissolve the fertilizer in water before applying.

### British Warships Speedy

Two New Vessels Are Faster Than Rodney Or Nelson

The British admiralty has disclosed the battleship, the Prince of Wales, like her sisterships, the King George V., will be appreciably faster than the older 35,000-ton battleships Rodney and Nelson. The King George V., launched Feb. 21, is expected to attain a speed of 30 knots against the Nelson's 23 knots. The Prince of Wales was launched by the Princess Royal. This newest ship will also have the same armament and protective devices as the \$40,000,000 King George V., including ten 14-inch guns, firing a new shell 20 miles that will smash through ordinary armor plating and continue another mile.

Gregory I, who was a follower of Benedict and was made pope in 590, was the first monk to take the papal office.

A German scientist claims to have exploded atoms, producing a force 30 times as powerful as radium.

### SHIRTTROCK AIDS SLIMNESS

By Anne Adams

Into the world of spring fashion comes this "look slimmer" design... the newest, easiest-to-make and most gracious of "button-front" dresses. Scalloping on collar, sleeves and pockets snaps up its smartness to a peak of charm... and rounding off these pretty petal-like curves is simple as A, B, C (as you'll find from the Sewing Instructor of Pattern 4089). In a geometric cut or rayon, this neat yoke-style creation is right for every casual day-time event. In a light-color cotton it changes its character to be the ideal kitchen-and-porch frock... cool and dainty too for cottage wear in blistering weather. Do without the scollaps if you prefer a plainer dress. Pattern 4089 is available in misses' and women's sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46. Size 36 takes 4 1/2 yards 35 inch.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Please include Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

### Britain Will Be Ready

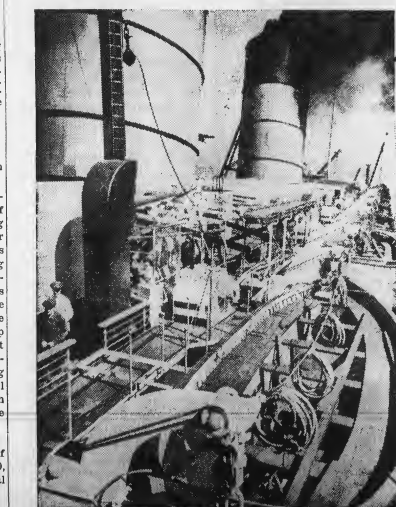

New York Paper Believes Nation Ready For Any Eventualities

The fact the British building at the New York World's Fair was ready for the opening, while the pavilions of most other participating nations were behind schedule, caused the New York Times to comment that "whatever the occasion, when the time comes, England will be ready."

"Great Britain to-day may seem leisurely, unburied, confused and long-suffering under gibes and provocations," the editorial said. "But those who know her best feel sure that, whatever the occasion, when the time comes, England will be ready."

A piece of wood that has been weighted and lowered to a great depth in the sea will no longer float when brought back to the surface.

### THE NEW "MAURETANIA" NEARLY READY

The new British liner "Mauretania" will make her maiden voyage across the Atlantic Ocean on June 17th, and above we have a view from the Bridge Wing looking aft.

### TIRED FEET

FIND INSTANT EASE WHEN YOU RUB

### Some Popular Beliefs

Have Been Thoroughly Debunked By Authorities At Ontario Museum

An ostrich doesn't bury its head in the sand, a snake has no hypnotic power, bats are not attracted to hair, and toads cannot cause warts. Salamanders are allergic to heat, there is no such thing as a "glass snake", a porcupine cannot throw its quills, a roadrunner doesn't imprison rattlesnakes with a fence of cactus and a horsehair rope won't keep reptiles out of your camp tent.

Pausing for breath here and there two eminent Toronto authorities on these subjects came out of a scientific huddle and made the foregoing debunking pronouncement. They were L. L. Snyder, assistant director of the Royal Ontario Museum of Zoology, and E. B. S. Logier, herpetologist.

The ostrich, for instance, said Mr. Snyder, actually lies down and stretches its neck along the ground to hide.

Some birds and animals "freeze" when in danger from a snake, said the herpetologist, but they do so to bide and avoid attention. On the other hand the creature may not be disturbed by the almost imperceptible movement of a snake until "its goose is cooked," he said.

Salamanders, lizard-like creatures supposed to breathe fire, actually die in air temperature of more than 70 degrees.

There is no such thing as a glass snake, parts of which are supposed to have the power to break up and reunite. Certain species, Mr. Logier said, can drop off their tails in emergencies, but reunion is impossible. The appendage grows to its normal length in time, he said.

### Honored By Portugal

Government Conferred Its Highest Decoration On King George

The Portuguese Government conferred upon King George VI the Cordão of the Grand Cross of the Three Orders, the highest Portuguese honor, reserved for chiefs of state.

The honor was extended "in witness of the centuries-old friendship which unites Portugal and Great Britain, the sentiments of the Portuguese people toward the British people and their sovereigns and the solidarity of the old alliance existing between the two countries."

The name of the decoration, which is rarely conferred, derives from the fact that it includes three insignia—the Orders of Christ, Aviz and St. James the Sword.

Pet raccoons in Chicago's Trailside Museum enjoy wrestling matches that sometimes last an hour.

Clouds hide the sun only about 12 per cent. of the time in Yuma, Ariz.

### SUNDAY SCHOOL LESSON

MAY 21

BEVERAGE ALCOHOL AND THE HOME

Golden text: Drink no wine nor strong drink, thou, nor thy sons with thee. Leviticus 10:9.

Lesson: Jeremiah 35:5-10; Ephesians 5:15-21.

Devotional reading: Colossians 3:5-17.

### Explanations And Comments

"Pagan Folly and Christian Ferocity" Ephesians 5:15-21. Paul has been contrasting a series of pagan vices and Christian virtues, and here in verse 15 he bids the church at Ephesus be careful of their manner of life, living not like the unwise, the pagans, but as the wise, the Christians. "Christians, particularly in their social life, are to avoid the frivolity, the thoughtlessness, the folly of the age, and are to live as wise men. The wisdom should be manifest specifically in redeeming the time. This does not mean in making the time better; nor in 'making the best use of time.' The word for 'time' more strictly denotes 'opportunity,' or 'fit time.' Nor does the word 'redeem' necessitate the statement of any particular price paid. The entire phrase seems to mean making the most of every opportunity." The wisdom of their father would thus consist in their careful endeavor to seize upon every fitting season for doing good, and to make their own every possible season for the fulfillment of duty.

This would indeed require promptness and discerning zeal, and a careful effort to do to opportunity "unusually." (C. R. Erdman.)

Because the days are evil, morally corrupt, the Christians must give extra heed to some opportunity for Christian effort escape them. Therefore they must not be foolish, like the pagans, but be wise, and obey the will of God.

One particular form of pagan folly was drunkenness. Paul admonished the Christian not to be drunk with wine, wherein is riot, debauchery, but to be filled with the Spirit, be under the control of the Spirit of Christ. "It was not a mystical or spiritual experience. It was the prerogative of any one believer nor of any one class of Christians. It was an experience frequently repeated in the life of individuals and of the Church. To be filled with the Spirit was the normal state for every follower of Christ." (C. R. Erdman.)

In contrast to the ribald singing of the drunken, Christians should express their thoughts in psalms and spiritual songs, making melody in their heart to the Lord. The silent music of the rejoicing heart is to accompany the praise of anointed lips.

### Would Solve Mystery

Half-Submerged Wreck In Lake Huron Believed To Be Ship Lost In 1679

The weather-beaten wreckage of an old sailing vessel lying half-submerged in Mississauga Strait in Lake Huron at the western end of the Bruce Peninsula may solve a 260-year-old mystery—the fate of the good ship Griffon, which disappeared in September, 1679.

Sieur de Lasalle, French explorer who first followed the Mississippi from the Great Lakes to the Gulf of Mexico, loaded the Griffon with furs in Green Bay, Lake Michigan, and sent it back to Niagara Falls. The vessel was lost, and many historians believe the bleaching skeleton near Mississauga Strait lighthouse of Manitoulin might be that of the ill-fated exploration ship.

Roy F. Fleming, Ottawa historian and expert on Lasalle's explorations has asked the Dominion government to raise the wreck this summer. The transport department has an appropriation of \$25,000 in this year's estimates for raising wrecks and destroying derelicts.

The old wreck has already been examined by numerous historical experts and identity of the ship has been under dispute. Samples of its oaken timbers have been sent to the Anthropology Department of University of Chicago to determine whether the timbers might have come from the Niagara peninsula, where the Griffon was built. A boat and nut were sent to the National Laboratories of the Department of Arts and Trades at Paris, and the French authorities reported they were made in France prior to the 18th century.

An anchor believed lying on the bottom of the Strait may have been the personal gift of Louis XIV. to Lasalle and will be sought when and if the Griffon is raised, in the belief it may bear identifying markings.

Mozart was born almost a quarter century after Haydn, yet he attained eminence and died before the latter reached his pinnacle in the musical world.

To preserve the color and texture of strawberry jams and jellies, they should be stored in a dark cool place.

The man who advertises not only means business, but does business.

Glass is composed of three-quarters sand. 2307

### HOME SERVICE

STRIKING SLIP COVERS MADE IN SIMPLE STEPS

### Smart To Combine Fabrics

Fresh as a spring day—this stunning slip cover style transforms your wintry-looking chair. And it costs little, for you easily make it yourself.

Smart to combine a striped fabric with a plain one. Pretty and long wearing is a closely woven cotton in a woody gray pattern. A new-style straight founce with a "kick pleat" at each corner.

Now for the basting, trying on and stitching. The smart founce is the last step—and you make it easily from a single piece of fabric.

Complete details of cutting, fitting and finishing slip covers are given in our 32-page booklet, "Tells clearly with instructions and diagrams how to fit any type of chair or sofa. Gives helpful advice on color schemes, trimming, fabrics."

Send the in coins for your copy of "How To Make Slip Covers" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The following booklets are also available at 15c in coins each: 117—"Effective Phrases For All Occasions" 162—"Public Speaking Self-Taught" 129—"The Meaning of Dreams" 116—"How to Choose and Care for Your Dog" 114—"Good Letter-Writing Made Easy"

### Gorillas Are Dangerous

Zoo Keeper Has Wholesome Respect For Their Powers

Take it from one who should know and don't pick a fight with a gorilla. John Milten, keeper of Detroit's zoo, has come out with complete agreement to former Heavyweight Champion Gene Tunney's suggestion that a good fighter could whip a monster ape.

"No guy who ever lived could stand up to a full-grown gorilla or even a half-grown one, or further—a half-pint gorilla," Milten said. "A gorilla has more than two hands, arms and fists. He has four. What chance would any champ have fighting an animal that could throw a pine of left hooks and two right crosses at him with a one-two tempo?"

"Put six Jack Dempseys, three Tunneys and four Gaietas into an enclosure and turn 'em loose and your gorilla would reduce all 13 of them to hamburger in less than a round."

Not Proud Of Her Age

Granny Elsie Fletcher, the second oldest woman in Britain, is not proud of the fact. When she had her 100th birthday there was no celebrating and no cake. She usually hides under the clothes when visitors pass her bed at the homes for old people at Queen's Road, Croydon.

The largest brass cannon ever cast in the world was made in India in 1548, and weighed 80 tons. How it was transported to those days still is a mystery.

CHAPTER IX—Continued

Then he reached her, and she knew immediately and entirely what it meant, for he caught her into an embrace of urgency and iron and bent his bare yellow head and kissed her again, and the kiss on the earth differed only from the one at an altitude of three thousand feet in feeling and duration.

Sarah Lynn was held in a vice; she could not move her body or her lips, but her mind ran and leapt and soared.

all—she tried to sound reasonable and detached—“birds do come down sometimes, don't they, and build nests and—”

He shrugged his lean shoulders. His mouth looked beaten, baffled. “Everything blocking the way, I have conquered. Now this conquers me. I know it. Never can I lose you. If I fly across the ocean, still you are there. My life breaks in pieces. What now can I do?”

Sarah Lynn thought wistfully of one thing at least, and apparently the same idea occurred to him, for his long arms shot out and caught her to him in a straining hug.

“So then! It is finished!” he lamented.

It was beginning, she exulted to herself.

He released her and took her thin shoulders in a tense grip. “There remains a thing for you to tell,” he said imperatively. “How have you the deep knowledge of kissing?”

“Oh, but I haven't, really!”

“Yet, you said you could tell—”

“Well, of course, boys—it always happens. But it doesn't count at all,” she said earnestly. “Duncan was always trying, but—”

“From this day—the ultimatum sounded—‘you jump no more; you kiss no more.’”

“Very well,” Sarah Lynn agreed in a small voice.

He frowned and sighed. “To-night I speak to your father.”

“Oh, Gunnar, not to-night, please! Let's wait a little.”

He shook his head. “We quickly marry. We go to Norway.”

They go to Norway. She sat down limply with her back against a pungent laurel. “Gunnar! It takes my breath!”

He sat down beside her. “It is my country. Also, I have there the good chance.”

“My mother—” Sarah Lynn said in a stricken voice.

He disposed of her mother briskly. That was the way it happened to mothers; daughters grew large and made marriages and went away with their husbands.

Husbands! Marriages! Norway! The world was filled with strange and startling words.

“Gunnar, have you noticed that funny old thing on Uncle Lynn's wall—the pipe-rack in burnt wood, with the verse?”

He nodded.

“Did you read it?”

“It matters not how strait the gate.”

“Yes, I have thought. ‘But of course! It must be straight. How shall a gate be crooked?’”

“It's a different kind of straight, Gunnar! This means narrow. You know, in the Bible? ‘the strait way’?”

A girl made that for Uncle Lynn, just after he knew he would sit still in a chair all his life, and he's kept it there all these years although he's not a sentimental person at all, and it looks so pathetic among his etchings and his beautiful books. He must have loved her, I think. That sort of poetry is terribly out of style, now.”

“It matters not how strait the gate. How charged with punishments I am the master of my fate: I am the captain of my soul.”

“Like hoop-skirts or bustles and bangs. People don't read—”

“That I like,” Gunnar interrupted. “Captain of my soul. It is good.”

“Yes. But the thing I'm thinking of is the ‘strait gate,’ Gunnar. That comes first, you see. And before I can think of Norway, and us, I must tell my mother and that will be the straightest gate in my life.”

He laughed. “You jump over it! And I wait for you on the other side.”

But Sarah Lynn shook her head. “No; you don't jump over strait gates. You crawl through.”

Danavale was difficult for Sarah Lynn in those days. It was a joyful escape to have Conrad Jordan invite them to a house-party at his Lake Tahoe lodge. He was staking an air-tour to demonstrate the practicability of an airport at an elevation of over 6,000 feet in the High Sierras, and Gunnar Thorwald, Norwegian ace, making the fifteenth

plane in the meet, gave international importance to the event.

Sarah Lynn rode with him in the Hermod, flying over the Santa Clara valley and the Sacramento. It was perfect flying weather, clear, bright, calm, with boundless visibility.

“This is the way our life is going to be,” the girl told herself. In just a little space of time the trials and the tears would be over—beneath them, behind them.

Gunnar Thorwald was thrilled and stimulated, she had never seen him so alert and eager.

“This also I like!”

He brought the Hermod, swift messenger of the gods, smoothly and silkily to the earth and Conrad Jordan came hurrying to meet them, elated with the triumph of his project—15 shining ships of the air on the line at Rabe's field.

Conrad Jordan got to his feet and moved restlessly about the beautiful big room with its dark wood and mellow leather and heavy Navajos. It was evening.

“Play, please,” Gunnar said from the hearth.

Conrad Jordan sat down at the piano and hunted through a pile of music.

The youth lifted himself on an elbow. “No! The music you have yourself made.”

He had found the shabby notepad he was looking for and took out some clippings. Here's a thing I found in a paper—“The Feeling of Star.” Random lines; fellow jotted down bits of his favorites here and there. I've been meaning to work out something—” he smoothed out the printed slip and read aloud: “I am in love with high, far-reaching places”—and this—“Space, and the twelve clean winds of heaven”—He began to play, feeling his way among the notes, the chords.

Sarah Lynn leaned back in a great deep chair which made her seem childishly small, and the aviator stretched himself flat against his hands folded behind his yellow head.

“This was the one I liked,” Jordan said, his fingers halting.

“But I shall go down from this airy space, this stinging exultation; And time will close about me, and my soul stir to the rhythm of the daily round. Yet, having known, life will not pre-empt me close. And always I shall feel time ravel thin about me. For once I stood in the white windy presence of eternity.”

Astronomical Mystery

Puff Ball Stars Present A New Problem To Scientists

McDonald observatory was dedicated with announcement of discovery of new mystery—puff ball stars, which expand with a great flare of light and dim again all within one day.

The discovery, made recently at Harvard, was announced literally at the upper end of the great new telescope at Fort Davis, Texas, the 82-inch “eye” which will be operated jointly by University of Texas and University of Chicago.

Standing on the observing platform, Harvard's director, Dr. Harlow Shapley, told the new story to an audience sitting far below.

The new stars were observed near the outer edge of the small Magellanic cloud, a huge star world, nearly 1,000,000 light years away.

The reason the new stars puff up so rapidly is not yet clear. But it is indicated the puffing has something to do with the presumably smaller mass and less crowding of stars in their vicinity. The puff balls may be useful in enabling astronomers to discover what goes on in the unknown centres of star “universes” like the milky way.

One of the most exciting night news which at the press of a button will lift two people slowly to the ceiling where they may converse privately.

Goodbye, Blues  
on Ironing Day!

\$1.00 FOR YOUR OLD IRON

Your old iron no matter what its age condition or make is worth \$1.00 for the purchase of a new Coleman Self-Heating Iron. Ask your dealer early store handling hardware for \$25.00 TRADE-IN CERTIFICATE worth \$1.00 toward the purchase of your new Coleman iron, or write The Coleman Lumber and Saw Company, Ltd. Dept. W-125 Toronto, Ont. (81315)

Coleman SELF-HEATING Iron

plane in the meet, gave international importance to the event.

Sarah Lynn rode with him in the Hermod, flying over the Santa Clara valley and the Sacramento. It was perfect flying weather, clear, bright, calm, with boundless visibility.

“This is the way our life is going to be,” the girl told herself. In just a little space of time the trials and the tears would be over—beneath them, behind them.

Gunnar Thorwald was thrilled and stimulated, she had never seen him so alert and eager.

“This also I like!”

He brought the Hermod, swift messenger of the gods, smoothly and silkily to the earth and Conrad Jordan came hurrying to meet them, elated with the triumph of his project—15 shining ships of the air on the line at Rabe's field.

Conrad Jordan got to his feet and moved restlessly about the beautiful big room with its dark wood and mellow leather and heavy Navajos. It was evening.

“Play, please,” Gunnar said from the hearth.

Conrad Jordan sat down at the piano and hunted through a pile of music.

The youth lifted himself on an elbow. “No! The music you have yourself made.”

He had found the shabby notepad he was looking for and took out some clippings. Here's a thing I found in a paper—“The Feeling of Star.” Random lines; fellow jotted down bits of his favorites here and there. I've been meaning to work out something—” he smoothed out the printed slip and read aloud: “I am in love with high, far-reaching places”—and this—“Space, and the twelve clean winds of heaven”—He began to play, feeling his way among the notes, the chords.

Sarah Lynn leaned back in a great deep chair which made her seem childishly small, and the aviator stretched himself flat against his hands folded behind his yellow head.

“This was the one I liked,” Jordan said, his fingers halting.

“But I shall go down from this airy space, this stinging exultation; And time will close about me, and my soul stir to the rhythm of the daily round. Yet, having known, life will not pre-empt me close. And always I shall feel time ravel thin about me. For once I stood in the white windy presence of eternity.”

Atlantic's New Deep Spot

An Undersea Chasm Near The Island Of Puerto Rico

A new deepest hole in the Atlantic ocean, over five miles deep, was discovered February 14 by the U.S.S. Milwaukee while she was participating in the recent fleet problem. The Milwaukee's sounding was made with a fathometer in the Puerto Rico Trough, an undersea chasm near the island of Puerto Rico, which possesses already the reputation of having the greatest depths in the Atlantic ocean.

Nares Deep within the trough was named for Admiral George Strong Nares (1831-1915), who as commander of H.M.S. Challenger recorded a sounding in that area of 3,875 fathoms on March 28, 1873. Rear Admiral Albert Gleaves, United States Navy, in command of the U.S.S. Dolphin, obtained a sounding of 4,662 fathoms in the deep in 1902. This was the record depth until the Milwaukee fount a hole nearly a half-mile deeper.

The Milwaukee's sounding was 4,780 fathoms, uncorrected for salinity, pressure and temperature. When corrected the depth will be in excess of 5,000 fathoms, and will be marked on new charts as “Milwaukee Depth.” — U.S. Army and Navy Journal.

He Saved His Money

Stonehamman In England Donates \$2,000 To A Hospital

John Snow, 80-year-old stone-mason, of Oxford, Eng., astonished his neighbors by giving \$2,000 to a hospital. He had never earned more than \$575 a week, but he and his wife had saved.

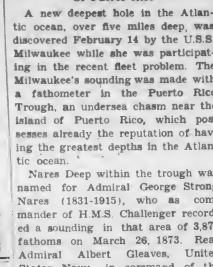

Snow, known locally as “the second Lord Nuffield,” told the Lord Nuffield, millionaire philanthropist, he and his wife had never been to a theatre and had never taken a holiday of more than one day at a time—a long time ago.

Long-Lived Beetle

One Wireworm Species Can Live For Seven Years Without Food

Insects can survive many of the extremes of heat and cold, drought and flood. Prof. R. H. Strickland, of the University of Alberta states that there is a species of wireworm beetle that can live for seven years without food. It is long lived and depending upon weather conditions it may mature in four years, or it may take nine years to complete its life cycle. In a season favorable to its development it may clean out a field in one year.

The economical, practical, and safe way to remodel or build is to specify GYPROC for all walls and ceilings.

● ECONOMICAL—because PERMANENT: GYPROC will not warp, shrink or swell.

● EASY TO HANDLE—cuts and nails easily as lumber.

● SAFE because FIREPROOF.

● PRACTICAL because of INVISIBLE JOINTS—This means smooth walls with no ugly seams or unnecessary panel strips.

● ANY TYPE OF DECORATION—The smooth surfaces take paint, calcimine, wallpaper, textures—any decoration you wish... and you can change it as often as you like.

● INEXPENSIVE—despite its exclusive advantages! Be sure you get genuine GYPROC—you can identify it by the Green Stripe on the edge of every board.

GYPROC is available everywhere in Canada. Ask your local dealer in Builders' Supplies and Lumber, or send the coupon below for free booklet.

Spinster: "What number is my  
room? I hope it isn't thirteen."  
Hotel Porter: "No, madam. You're  
suite sixteen."  
Spinster: "Now, now, naughty,  
naughty."

"Are they fresh?" asked a woman  
buying fish from a costermonger. The  
coster looked at his long-dead stock.  
"Fresh, mum? Why, just look at 'em."  
And turning to his wares he shouted,  
"Lie still, can't you? Lie still."

## Locomotive of Royal Train Ready

Scheduled for the biggest job  
ever assigned to a steam loco-  
motive, Canadian Pacific engine  
2850, photographed at the Angus  
Shops in Montreal, is ready to  
haul Their Majesties the King and  
Queen on their 3,000-mile trip  
across Canada. The royal tour  
will mark the first time one engine  
has made a continuous journey of  
this length, and 2850's record will  
not be equalled on the tour.  
Specially re-fitted and decorated  
for the occasion the big Canadian  
Pacific locomotive is a mass of  
shining stainless steel, royal blue,  
silver and gold. The semi-stream-

lined engine bears the royal arms  
over the headlight which has  
been sunk flush with the front  
of the boiler-casing; Imperial  
Crowns decorate each running  
board; the crest of the Canadian  
Pacific appears beneath the win-  
dow of the cab and, on the tender,  
the royal arms four feet high are  
blazoned in relief.  
The general decorative scheme  
comprises a background of deep  
blue on the underframe, smoke-  
box, front of engine and all mar-  
ginal work on engine and tender.  
The sides of tender, cab and run-  
ning boards are painted Royal  
Blue.

A panel of aluminum leaf laid  
in diagonal squares matching the  
panel on the cars of the royal  
train extends half way on the  
tender. The panel is outlined in  
gold.  
The jacket on the locomotive,  
handrails on it and the tender and  
other trim is of stainless steel.  
Gold leaf has been employed on  
the engine numbers.  
Engineer Eugene Leclerc, of  
Quebec, who was fireman on the  
royal train in 1901, will be the  
first Canadian engineer. He has  
been in regular Canadian Pacific  
service between Quebec and Mont-  
real for approximately 48 years.

## POLICE COURTESIES

McGuinness had been posted to keep  
guard over the entrance to a bridge.  
Presently a car came along and Mac  
held up his hand.

"What's the matter?" growled the  
driver. At that moment McGuinness  
recognized him as the county magis-  
trate.

"Oh, it's yourself, yer Honor," he  
said genially.

"Yes, it is!" was the snappy answer.  
"Tis all right, then," said Mac, as he  
stepped politely out of the way.

"I got orders to let no trifle through  
because of the rotten bridge, but,  
seem' it's you, yer Honor, 'tis a  
pleasure. Go right ahead."

Little Ike came up to his father  
with a very solemn face. "Is it true,  
father," he asked, "that marriage is a  
failure?"

His father surveyed him thought-  
fully for a moment. "Well, Ike," he  
finally replied, "if you get a rich wife  
it's almost as good as a failure."

## KELVINATOR ANNIVERSARY — MOTORDROME MAKES AN ANNOUNCEMENT

Pioneer of the home electric re-  
frigerator, KELVINATOR is celebra-  
ting the 25th anniversary of 25 years'  
experience in this field of refrigeration.  
It is claimed by KELVINATOR  
that food costs are cut 20% by the  
use of their refrigerators, and a very  
attractive folder giving particulars of  
economies to be effected is available  
at The Motordrome, the proprietor of  
which, Mr. James Kerr, will gladly  
give all information as to operation,  
financing, etc.

See display advertisement.
